**Description of Problem**

Please include a detailed description of the issues, as well as a description of and a copy of any professional studies, citations or reports from government entities, recommended solutions, and any cost information or estimates. If additional space is needed, please attach.

On Thursday, August 16, it was noted that the paint chips on the grounds of Mobile ESD may contain asbestos. The paint chips were a result of power washing the exterior walls of the school buildings in preparation for refinishing and painting. Due to the age of the buildings, there was concern the paint chips may contain asbestos. The paint chips were tested by Native Environmental and came back positive.

It is necessary and required that the campus be cleaned of the paint chips. They have been dispersed over a wide area of the campus due to weather and use of the grounds. This will be very costly. Mobile ESD is requesting monetary assistance from the School Facilities Board to remedy this situation to make our school campus safe for students and staff.

Mobile ESD simply does not have the funds to cover this expense. I have been informally notified that the TRUST will cover \$25,000s. This total amount barely covers the weekend work--and there is much work yet to be done.
